

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1-12 (Canceled).

13. (Currently Amended) A laminated floor board comprising at least one cellulose sheet impregnated with a resin that is mechanically pressed and cut into a product, said product having ~~[[an]]~~ a fiberboard core, wherein the product includes a surface with both a perimeter area having an edge contour and an interior region, wherein the perimeter area is relieved such that a portion of the edge contour is below the interior region, wherein the interior region has a surface texture that varies in accordance with a visual pattern, wherein the visual pattern imitates another product, and wherein the edge contour has a predetermined shape.

14. (Currently Amended) A laminated ~~material~~ floor board according to claim 13, wherein the edge contour has a substantially linear shape from the interior region to an edge of the product.

15. (Currently Amended) A laminated ~~material~~ floor board according to claim 13, wherein the shape of the edge contour is a substantially ~~linear~~ continuous curve from the interior region to an edge of the product.

16. (New) A laminated floor board according to claim 13, wherein the portion of the edge contour that is below the interior region has been pressed below the interior region.

17. (New) A laminated product that has been mechanically pressed and cut to form individual units thereof, each individual unit including a surface having an interior region and an edge contour region, wherein at least a portion of the edge contour region has been pressed below the interior region, wherein the interior region has a surface texture that varies in accordance with a visual pattern, wherein the visual pattern imitates another product.

18. (New) A laminated product according to claim 17, wherein the edge contour region has a substantially linear shape from the interior region to an edge of the product.

19. (New) A laminated product according to claim 17, wherein the shape of the edge contour region is a substantially continuous curve from the interior region to an edge of the product.
